

Viku: An Art Language

ᄀᄁ ᄂᄃ ᄄᄅ ᄆᄇ ᄈᄉ ᄊ

kuvasi analu in viku |

Viku (pronounced "VEE-koo") is an art language, created as an expression of my personal philosophy of minimalism, simplicity, and xenophilia. It is for serious fun only. One of my motivations for creating Viku is to provide a beautiful platform for writing poetry.

Inspiration for Viku arose from Japanese and Polynesian languages. We could imagine people living on a tropical island speaking it. [Lojban](#), a language based on predicate logic, has a great influence on Viku grammar. The Viku script is based on Inuktitut, a language spoken in the Arctic. Viku is a crucible for blending primitivism with modernism.

In Papua New Guinea, there is a natural language called Rotokas spoken by about 4000 people. It has only 11 phonemes (sounds), consisting of 5 vowels and 6 consonants. This is the smallest known phonemic inventory in the world. In Viku, my ambition was to beat Rotokas in being even smaller. I wanted only 10 phonemes: 3 vowels, 7 consonants. The whole Viku alphabet is: a, i, k, l, n, p, s, t, u, v. Any comments are welcome. **Victor**

	la		li		lu	
	na		ni		nu	
	pa		pi		pu	
	sa		si		su	
	ta		ti		tu	
	va		vi		vu	

Viku can be written using the above native script or in plain Roman letters.

Viku has 10 simple phonemes. There are seven consonants and three vowels.

The three vowels are:

a as in **f**ather /a/

i as in mach**i**ne /i/

u as in **l**unar /u/

The seven consonants are:

k as in **s**kin /k/

l as in **l**ove /l/

n as in **n**ight /n/

p as in **s**pin /p/

s as in **s**un /s/

t as in **s**tick /t/

v as in **v**ictory /v/

The stress in a polysyllabic word is always at the penultimate syllable (the second-to-the-last syllable).

Careful speakers will enunciate the vowels distinctly as /a/, /i/, and /u/ in both stressed and unstressed positions. Some lax speakers may use /@/ (as in **a**bout), /I/ (as in **bi**t), and /U/ (as in **pu**t) in unstressed positions, but keep /a/, /i/, and /u/ in stressed positions. Speakers with difficulty with /v/ may pronounce it as /w/ (as in **w**ater). Speakers with difficulty with /l/ may pronounce it as /r/.

Viku: Grammar

Typology

Viku is an *isolating* language. A purely isolating language does not use affixes or root modifications like "walk, walks, walking, walked" in English. Each Viku word is invariable, and meanings have to be modified by inserting additional words, or understood by context. In more modern parlance, Viku is a highly *analytic* language.

Parts of Speech

There are three major parts of speech in Viku: predicate words, structure words, and names. Predicate words, the roots, are listed in the [Vocabulary](#). They are the "meat" of the language. Structure words, which are described on this page, are small words that hold the language together. They are the "bones" of the language. Names are those of specific people, things, events, and places.

The roots are called "predicate words" as they are not really verbs, nouns, adverbs, or adjectives, but can function as any of these. Regular terminology of English grammar makes less sense in the context of Viku. The parts of speech of Viku have certain phonological signatures. Predicate words have a structure (C)VCV or (C)VCVCV where C is a consonant and V is a vowel. Structure words have a structure (C)VC or (C)VCVC. Names can be of any length (C)V...V(C) as long as C and V are alternating.

Sentence Structure

The Viku sentence expresses a predicate relationship which is held together by a 'functor' with its zero or more arguments. In English grammar, the functor corresponds to the verb; the arguments correspond to nouns, pronouns, et cetera. In Viku, the functor normally goes in the beginning of the sentence.
functor argument1 argument2 argument3...

If we look at the [Vocabulary](#), we see defined the predicate word for "come/go" is latu:

latu x1 comes/goes to destination x2 from origin x3 via route x4 using means/vehicle x5

We can make a sentence like the following:

latu an apatu in pali in nuvuk |

go ART person ART Paris ART New York

functor argument1 argument2 argument3

The person is going to Paris from New York.

Two articles (ART) mark the arguments. The **common article** 'an' is for unnamed objects, persons, events, and places, while the **name article** 'in' is for named objects, persons, events, and places. There is also the **functor article** which is 'un'; it is used to disambiguate the functor, for example in cases when the functor is not at the beginning of the sentence. This article may often be omitted if there is no ambiguity.

an apatu in pali un latu in nuvuk |

ART person ART Paris ART go ART New York

argument1 argument2 functor argument3

The person is going to Paris from New York.

As you can see, the functor can be moved to a different slot in the sentence.

The bar | marks a pause and takes the place of periods, commas, semi-colons, question marks, and exclamation marks that would appear in an English sentence. You will note that capital letters are not normally used in Viku.

A sentence may optionally begin with 'iv' and optionally end with 'uv'. These may be used to disambiguate the limits of a sentence. Usually, the pause | is enough to disambiguate the limits of sentences.

iv latu an apatu in pali in nuvuk uv |

BEGIN go ART person ART Paris ART New York END

functor argument1 argument2 argument3

The person is going to Paris from New York.

Some structure words used as arguments:

kut	I/me/my
kus	we/us/our (inclusive, with you)
kup	we/us/our (exclusive, without you)
vat	you/your (singular)
vas	you/your (plural)
tat	this/this-here/this one's, he/him/she/her/it/its
tas	these/these here/these ones', they/them/their
tit	that/that-there/that one's, he/him/she/her/it/its
tis	those/those ones', they/them/their
tut	that yonder, he/him/she/her/it/its
tus	those yonder, they/them/their
nus	unspecified value (used when an argument is unimportant or obvious)

The structure word 'nus' can be used to skip an argument; however, if 'nus' is at the end of the sentence, it may be omitted. In previous examples, we have skipped arguments 4 and 5.

latu kut nus an niniva |

come I ARG2 ART home

functor argument1 argument2 argument3

I am coming from home.

latu tis |

come they/those

Those/They are coming.

A functor without arguments is a perfectly grammatical sentence in Viku. Often, the context disambiguates who or what are involved.

latu |

come

(Someone/something) is coming.

Plurals

Number is not usually explicit when refering to predicate words, so 'an apatu' may mean '(the/a/some)

person(s)'. If you want to be explicit with plurality, precede the predicate word with 'pan', so 'an pan apatu' means '(the/some) persons'. If you want to be explicit with singularity, precede the predicate word with 'satus' (one), so 'an satus apatu' means '(the/a/one) person'. Usually, context gives the number and you then do not need to be explicit.

Varying the Order of Arguments

The place structure specifies the numerical order of arguments, but this can be varied. An argument may be placed out of numerical order by labelling it with a tag. When a tag is used for one argument, all other arguments must be tagged as well.

kap	argument1
lap	argument2
nap	argument3
pap	argument4
sap	argument5

nap in nuvuk lap in pali kap an apatu un latu |

TAG3 ART New York TAG2 ART Paris TAG1 ART person ART go

argument3 argument2 argument1 functor

The person is going to Paris from New York.

Switching Place Values

Place values can be reordered by tagging the predicate word with special structure words.

lip	switch place values 1 and 2
nip	switch place values 1 and 3
pip	switch place values 1 and 4
sip	switch place values 1 and 5

We see from the [Vocabulary](#) that 'to talk' which is 'apunu' is defined as follows:

"x1 talks/speaks to x2 about subject x3 in language x4."

apunu TALKER TALKED-TO SUBJECT LANGUAGE

TALKER talks/speaks to TALKED-TO about SUBJECT in LANGUAGE

We can reorder the place values:

lip apunu TALKED-TO TALKER SUBJECT LANGUAGE

nip apunu SUBJECT TALKED-TO TALKER LANGUAGE

pip apunu LANGUAGE TALKED-TO SUBJECT TALKER

For example:

lip apunu in niki kut an vituta in viku |

ORD is-talked-to ART Nicky me ART mathematics ART Viku

Nicky is talked to by me about mathematics in Viku.

nip apunu an vituta in niki kut in viku |

ORD is-talked-about ART mathematics ART Nicky me ART Viku

Mathematics is talked about to Nicky by me in Viku.

We can see that emphasis and semantics are different when place values are reordered for the functor. What about in the arguments themselves?

Compare the following examples:

latu an apunu in pali |

go ART talker ART Paris

The talker is going to Paris.

latu an lip apunu in pali |

go ART ORD talked-to ART Paris

The one talked to is going to Paris.

In an argument itself, we can see that any place value can be referenced: 'an lip apunu' = one-talked-to, 'an nip apunu' = subject-talked-about, 'an pip apunu' = language-used-to-talk. Note that a predicate word without a reordering tag and used as an argument refers to the first place value: an apunu = talker.

Yes/No Questions

A yes/no question is preceded by the structure word 'kal':

kal latu vat in pali |

QUES go you ART Paris

Are you going to Paris?

But when you want to be specific about questioning a certain part of the sentence, precede the word or argument with 'kal':

latu vat kal in pali |

go you ART QUES Paris

Is it Paris where you are going?

'Yes' is 'vak'. 'No' is 'nik'.

Question Argument

The structure word 'kul' questions the value of an argument. It may ask 'who?', 'what?', 'where?', 'why?', or 'when?'.

latu kul in pali |

go QUES ART Paris

Who/What is going to Paris?

latu vat kul |

go you QUES

Where are you going?

Question Predicate

The structure word 'kil' questions the functor of the sentence.

kil vat in pali |

QUES you Paris

functor argument1 argument2

What are you doing in/about/to Paris?

Positive-Negative Scale

vak	strong positive, yes, indeed, certainly
vik	somewhat positive
vuk	neutral
nik	negative
nuk	opposite

These can be placed before a predicate word.

vak sinala tat |

YES high this

This is certainly high.

vik sinala tat |

SOMEWHAT high this

This is somewhat high.

vuk sinala tat |

NEUTRAL high this

This is neutral on the high-low scale.

nik sinala tat |

NO high this

This is not high.

nuk sinala tat |

OPPOSITE high this

This is low (opposite of high).

Imperatives

An imperative or command can be expressed by 'vit' (abrupt) or 'vis' (polite) placed before the functor. **vit**

apunu [vat] |

ABRUPT talk [you]

[You] talk!

vis apunu kus |

POLITE talk we

Please, let's talk!

vit apunu tat |

ABRUPT talk he

Let him talk!

Temporal Tense

In Viku, tense is completely optional. Often context disambiguates when an event occurs. However, if you would like to be specific about time, there are structure words for it which are placed before the predicate word.

pal	past
pil	present
pul	future
pat	short time distance
pit	medium time distance
put	long time distance
pak	short time interval
pik	medium time interval
puk	long time interval

pal latu kut |

PAST go I

I went.

pul latu kut |

FUTURE go I

I will go.

put latu kut |

LONGDIST go I

A long time before or from now, I went or will go.

pal put latu kut |

PAST LONGDIST go I

A long time ago, I went.

pul pal pat latu kut |

FUTURE PAST SHORTDIST go I

I will have just gone.

pal pak latu kut |

PAST SHORTINT go I

For a short interval, I went.

Note that 'time distance' when used by itself can be a distance into the future or into the past.

Spatial Tense

If you would like to be specific about spatial tense, there are structure words for it which are placed before

the predicate word.

sal	here
sil	there
sul	there yonder
sat	short spatial distance
sit	medium spatial distance
sut	long spatial distance
sak	short spatial interval
sik	medium spatial interval
suk	long spatial interval

sal apunu kut |
HERE talk I
I talk here.
sul apunu kut |
YONDER talk I
I talk there yonder.
sut latu kut |
LONGDIST go I
For a long distance, I go.
sak latu kut |
PAST SHORTINT go I
For a short spatial interval, I go.

The structure words 'sal', 'sil', and 'sul' may be used for demonstrative adjectives 'this' and 'that' in English. Do not confuse with 'tat', 'tas', 'tit', 'tis', etc. which mean 'this one's', 'these one's', 'that one's', 'those one's' etc when preceding a predicate word.

latu an sal apunu |
go ART HERE talker
This talker is going.
latu an tas apunu |
go ART THISONES talker
This one's talker is going.

Aspect

An aspect marker may be placed before a predicate word to describe the action. See the description on [Verb Aspect](#) for more information. Here is a list of the aspect markers:

Marker	Aspect	English Example
palak	perfective	I was eating a mango when she entered .
pilak	imperfective	I was eating a mango when she entered.
salak	habitual	I used to eat a mango every morning
silak	progressive	I am eating a mango.

kapak	perfect (retrospective)	I have eaten a mango.
lapak	prospective	I am about to eat a mango.
lipak	inceptive	I am beginning to eat a mango.
lupak	inchoative	It is turning yellow.
napak	cessative	I am quitting eating mangoes.
nipak	pausative	I stopped eating mangoes for awhile.
nupak	resumptive	I resumed eating mangoes.
tatak	punctual	The camera flashed.
lalak	durative	I ate a mango for an hour.
titak	delimitative	I walked for a bit.
vatak	perdurative	I went on eating mangoes.
vitak	protractive	I ate mangoes on and on.
vutak	superfective	I kept eating my mango after the meal was over.
satak	iterative	I ate mangoes regularly.
sitak	random	I ate mangoes here and there.
sutak	frequentative	I ate mangoes frequently.
tavak	semelfactive	I knocked on the door.
tivak	simulfactive	I ate a mango in one fell swoop.
kipak	experiential	I have eaten a mango before.
vavak	intentional	I looked at the mango.
vivak	accidental	I fell on my butt.
valak	future utility	We will buy mangoes (for future eating).
tasak	distributive	I ate the mangoes one by one.
tisak	alternation	I ate a mango, did something else, ate a mango, did something else, etc.
kalak	generic	Mangoes grow on trees.
nanak	completive	Eat it all up.
puvak	intensive	It glared.
pivak	moderative	It shined.
pavak	attenuative	It glimmered.
kakak	crescendo	It glimmered, shined, then glared.
kikak	decrescendo	It glared, shined, then glimmered.

pal salak latu kut in pali |

Relative Clauses

lat	restrictive relative clause introducer
lit	non-restrictive relative clause introducer
tal	relative pro-argument (in the relative clause, it substitutes for the argument to which the relative clause is attached)
lut	relative clause terminator (may be omitted when no ambiguity)

upapi an apatu lat latu tal in pali [lut] |

big ART person RESTRICT go PROARG ART Paris [END]

This person who goes to Paris is big.

The difference between a restrictive and non-restrictive clause is that the former describes an essential attribute of the object in question, while the latter describes incidental information. A non-restrictive clause in English is often marked off with commas.

upapi an apatu lit latu tal in pali [lut] |

big ART person NONRESTRICT go PROARG ART Paris [END]

This person, who goes to Paris, is big.

latu an apatu lit upapi [tal] lut in pali |

go ART person NONRESTRICT big [PROARG] END ART Paris

This person, who is big, goes to Paris.

When the relative clause attaches to the functor, it acts adverbially in a corresponding English sentence.

Compounding and Modification

When a predicate word precedes another predicate word, the former modifies the latter in the way an adjective describes a noun or an adverb describes a verb in English.

akuka latu an upapi apatu |

The big person goes quickly.

In sequences of several predicate words, the compounding is cumulative grouped from the left: (((p1 p2) p3) p4)... so that (p1 p2) modifies p3 and so on.

an upapi apatu iku

((big people) company)

The structure word 'las' means 'of' and can be used the same way as English. The 'of' phrase can be terminated with the structure word 'lus' when ambiguity may arise as to its ending.

latu an apatu las upapi iku lus in pali |

go ART people OF big company END ART Paris

The people of the big company are going to Paris.

'las' is useful for discussing qualities, quantities, et cetera.

'tisani' (desire) is defined as "x1 desires/wants/wishes x2 (event/state) for purpose x3."

tisani kut an patuki las nusi |

Reference

In English, often one sentence refers to something from a previous sentence by the use a pronoun. By context, the reference is disambiguated.

The elephant goes home. It is blue. (Which? The elephant or the home?)

In Viku, there is a mechanism whereby the first syllable of the original word becomes the substitute as a name. For example:

latu an upapi nalinu an niniva | iluvi in na |

go ART big elephant ART home. blue ART it.

The big elephant goes home. It [the elephant] is blue.

In the previous example, 'na' substitutes for 'nalinu' (elephant). When there is a clash in the case that two or more arguments in the same sentence claim the same syllable, then we use the first *three* letters as substitute. Then the clash could be resolved.

Sometimes, we must refer to the entire previous utterance. We use the structure word 'tap' for this.

latu an upapi nalinu an niniva | alanu tap |

go ART big elephant ART home. good it.

The big elephant goes home. It [that the elephant goes home] is good.

Attitudinals or Emotional Indicators

The following may be placed anywhere in the sentence to express an emotion.

ak	hope
ik	desire
uk	interest
al	agreement
il	approval
ul	fear

ap	love
ip	peace
up	complaint
as	discovery, "Ah, I get it!"
is	surprise
us	wonder, "Wow!"
at	happiness
it	amusement
ut	repentance, "I'm sorry!"
av	pity, sympathy

The opposite can be expressed by placing 'nuk' before the emotional indicator.

OPPOSITE happy
